

Doggypaws Token Whitepaper

1. Introduction

Doggypaws (DPS) is a community-driven meme token inspired by real-life dachshunds, Lola and Flo. The project aims to create a fun, inclusive digital currency that supports dog lovers and animal welfare initiatives globally.

2. Tokenomics

Total Supply: 100,000,000,000,000 DPS (100 Trillion)

- 50% Burned to Dead Address
- 35% Reserved for Liquidity
- 15% Allocated to Development & Community Rewards

3. Smart Contract

The DPS token contract is deployed on the Base Chain and follows the ERC-20 standard. The contract has been verified and renounced, ensuring complete decentralization.

4. Airdrop Program

Eligible users can claim free DPS tokens by completing simple community tasks such as following on Twitter, joining Telegram, and referring friends. The airdrop is handled through a dedicated smart contract with randomized token distribution.

5. Use Cases & Vision

Doggypaws envisions creating a vibrant ecosystem that rewards community members and supports global pet causes. Future plans include NFT integrations, pet charity donations, and a merchandise store.

6. Security & Transparency

The Doggypaws contract uses audited OpenZeppelin libraries and has no owner privileges post-renouncement. The supply and distribution are transparent and verifiable on BaseScan.

7. Community-Driven

Doggypaws thrives on the energy and creativity of its holders. Community votes will guide future development, events, and partnerships.
